Forecast for Wednesday 20 Dec 2023

Weather: Snow showers overnight will become less frequent in the early hours. A band of persistent and at times heavy, driving rain arrives from the west before sunrise and lasts all day. This initially falling as snow above 600m, turning to rain from late morning. Cloudy throughout. The worst of the conditions for western upslopes.

Chance of cloud-free hill tops above 800m: 40% at first falling to less than 10% before sunrise.

Low cloud and visibility: Widespread persistent low cloud arriving before sunrise and lasting all day, with bases around 500 to 700m with patches lower down in west. Poor visibility in association with snow and later rain.

Met Office Aberdeen Meteorologist's View

Gusts in excess of 50mph will make progress difficult, particularly over summits and ridges. A combination of strong winds, low cloud and persistent snow turning to rain will give a significant wind chill.

Forecast for Thursday 21 Dec 2023

Weather: Winds strengthening overnight to become widespread west-north-westerly gales to low levels, with severe gales or storm force winds on summits. These easing somewhat through the afternoon and evening. Widespread rain and low cloud clearing in the early hours. Scattered heavy showers follow throughout the day, soon turning to snow with the freezing level falling to 400-600m by midday.

Maximum wind: West or northwesterly winds with average speeds widely 40-50mph and gusts of 80mph through the morning, reducing to means of widely 30-35mph and gusts of 55-60mph in the afternoon and evening.

Chance of cloud-free hill tops above 800m: 50% falling to 25% in the evening as more frequent showers arrive.

Low cloud and visibility: Cloud amounts variable and fast-changing in showers, with broken cloud bases frequently 600-800m and very poor visibilities in showers. Some bursts of excellent visibility outside of showers.

Temperature: **Glens:** Plus 7 Celsius becoming Plus 3 Celsius.
At 800m: Plus 1 Celsius becoming Minus 4 Celsius.
Freezing level: 800-1000m soon becoming 400-600m.
